* Sources

Environmental impact estimates for savings pertaining to the use of post consumer recycled fiber share the same common reference data as the Environmental Defense Fund paper calculator v2.0, which is based on research done by the Paper Task Force, a peer-reviewed study of the lifecycle environmental impacts of paper production and disposal.

Environmental impact estimates for savings pertaining to the use of papers made with renewable energy are based on the U.S. EPA Power Profiler. Values derived for the Neenah Green Eco-Calculator are from publicly available information sources.
